

6 7 8 9 10

Left Grid (1 finger):

	6	4
-	2	1
	4	3

Right Grid (2 fingers):

	4	3
+	3	5
	7	8

The diagram illustrates a two-step process for a piggy bank investment strategy. Step 1 shows a hand depositing a coin into a piggy bank. Step 2 shows a hand withdrawing a coin from the piggy bank, which is then shown as a coin being deposited into a separate green piggy bank.

Two empty 3x3 grids are provided for multiplication practice. The left grid is preceded by a hand showing the number 1, and the right grid is preceded by a hand showing the number 2. Each grid has a horizontal line drawn below it.

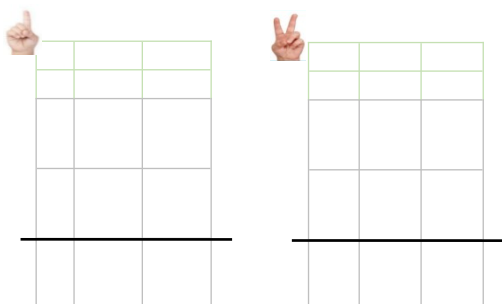

A diagram of a piggy bank. Two hands, one on the left and one on the right, are shown with arrows pointing towards the piggy bank, indicating money being put in. Inside the piggy bank, there are four coins labeled '10' and one coin labeled '1'. Above the piggy bank, there are three coins labeled '10' and two coins labeled '1'.

A diagram of a piggy bank. A hand on the left is putting a coin into the slot. A hand on the right is taking a coin out. Above the piggy bank, there are three green circles, each containing the number 10, and three green circles, each containing the number 1. Below the piggy bank, there are four orange circles, each containing the number 10, and six black circles, each containing the number 1.
