

6 7 8 9 10

Two 3x3 grids illustrating the addition of 64 and 35. Each grid has a hand icon in the top-left corner showing the number of fingers corresponding to the tens digit of the sum.

Left Grid (64 + 31 = 95):

	6	4
-	2	1
	4	3

The hand icon shows 9 fingers, representing the tens digit of the sum, 95.

Right Grid (43 + 35 = 78):

	4	3
+	3	5
	7	8

The hand icon shows 7 fingers, representing the tens digit of the sum, 78.

The diagram illustrates the 'Two-Handed Piggy Bank' strategy in two steps. In Step 1, a hand is shown putting a coin into a piggy bank. In Step 2, a hand is shown taking a coin out of the piggy bank, with a green coin floating above it, representing the 'winning' outcome.

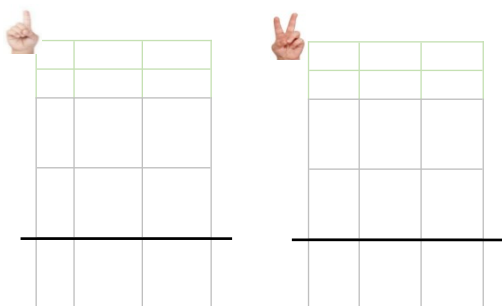

A diagram of a piggy bank. A hand on the left is putting a coin into the slot. A hand on the right is taking a coin out of the slot. There are four coins inside the piggy bank: three labeled '10' and one labeled '1'. There are four coins outside the piggy bank: one labeled '10' and three labeled '1'.

A diagram of a piggy bank. A hand on the left is putting a coin into the slot, with an arrow pointing into the bank. A hand on the right is taking a coin out of the slot, with an arrow pointing away from the bank. Inside the piggy bank, there are seven coins: three labeled '10' and four labeled '1'. Above the piggy bank, there are three green coins labeled '10' and one green coin labeled '1'.
