The diagram shows a piggy bank with two hands dropping coins into it. Step 1 shows a hand dropping a coin. Step 2 shows a hand dropping a coin, with a large arrow indicating the coin's path into the piggy bank.

1. $33 - 23 + 22 = (\quad)$

A 3x3 grid is shown. A hand is pointing to the top-left cell. The grid is divided into two sections by a horizontal line. The top section contains the top two rows, and the bottom section contains the bottom row.

A diagram of a piggy bank. A hand on the left is putting a coin into the slot. A hand on the right is taking a coin out of the slot. There are three coins on the left side of the piggy bank (two 10s and one 1) and three coins on the right side (two 10s and one 1).

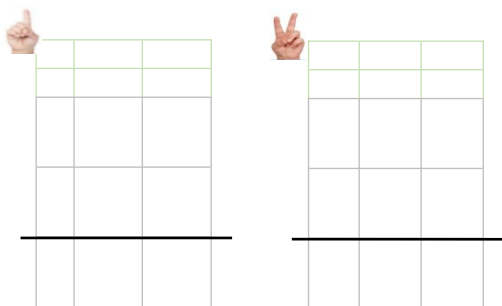

A cartoon illustration of a white piggy bank. Two hands, wearing orange sleeves, are shown interacting with the piggy bank. One hand is on the left, dropping a coin into the slot. The other hand is on the right, pulling a coin out. Several coins are shown floating around the piggy bank. There are five orange coins with the number '10' on them, and one orange coin with the number '1' on it. There are also five grey coins with the number '10' on them. The coins are arranged in a way that suggests they are being added and removed from the piggy bank.
