

6 7 8 9 10

The figure shows two 3x3 grids used for arithmetic operations with base ten blocks. Each grid has a horizontal line across the middle row.

Left Grid (Addition):

- Top row: 4 tens blocks (blue) and 3 ones blocks (red).
- Middle row: A plus sign (+) in the first column, 1 ten block (red) in the second column, and 1 one block (red) in the third column.
- Bottom row: 5 tens blocks (red) in the second column and 4 ones blocks (red) in the third column.

Right Grid (Subtraction):

- Top row: 5 tens blocks (black) and 4 ones blocks (red).
- Middle row: A minus sign (-) in the first column, 3 tens blocks (red) in the second column, and 2 ones blocks (red) in the third column.
- Bottom row: 2 tens blocks (red) in the second column and 2 ones blocks (red) in the third column.

$$14 + 23 - 31 = (\quad)$$

A piggy bank is shown on the left. To its right is a vertical stack of five coins. The top coin is labeled '10', and the four coins below it are each labeled '1'.

Diagram 1 shows a piggy bank with a stack of 10 coins (10, 10, 10, 10, 10, 10, 10, 10, 10, 10) and a stack of 10 coins (1, 1, 1, 1, 1, 1, 1, 1, 1, 1).
